

Investing in Resilience: Ensuring a Disaster-Resistant Future focuses on the steps required to ensure that investment in disaster resilience happens and that it occurs as an integral, systematic part of development. At-risk communities in Asia and the Pacific can apply a wide range of policy, capacity, and investment instruments and mechanisms to ensure that disaster risk is properly assessed, disaster risk is reduced, and residual risk is well managed. Yet, real progress in strengthening resilience has been slow to date and natural hazards continue to cause significant loss of life, damage, and disruption in the region, undermining inclusive, sustainable development. Investing in Resilience offers an approach and ideas for reflection on how to achieve disaster resilience. It does not prescribe specific courses of action but rather establishes a vision of a resilient future. It stresses the interconnectedness and complementarity of possible actions to achieve disaster resilience across a wide range of development policies, plans, legislation, sectors, and themes. The vision shows how resilience can be accomplished through the coordinated action of governments and their development partners in the private sector, civil society, and the international community. The vision encourages "investors" to identify and prioritize bundles of actions that collectively can realize that vision of resilience, breaking away from the current tendency to pursue disparate and fragmented disaster risk management measures that frequently trip and fall at unforeseen hurdles. Investing in Resilience aims to move the disaster risk reduction debate beyond rhetoric and to help channel commitments into investment, incentives, funding, and practical action

The economic argument for investment in resilience has been well-established, and while financial resources have started flowing to this end, **ABSTRACT - Resilience pays - How much should we be.**

Investing in Resilience. Resilient development is smart development. Natural disasters are threatening development gains in most of the developing world. By investing in resilience, we can better manage climate and disaster risk to help end extreme poverty and boost shared prosperity.

Publication Stock No. RPT Cataloging-In-Publication Data. Asian Development Bank. Investing in resilience: ensuring a disaster-resistant future. This report focuses on the steps required to ensure that investment in disaster resilience happens and that it occurs as an integral, systematic part of.

Three years ago, Resilient Cities was pioneered by The Rockefeller Foundation with an ambitious goal: to help cities across the globe. Natural disasters are threatening development gains in most of the developing world. By investing in resilience, we can better manage climate. A special acknowledgment to NAB as a proud partner of the joint IGCC/. NAB Investing in Resilience workshop that contributed to the development of this guide.

Resilience and low-carbon development make up the bedrock of how we plan and alter our

communities and serve as a vehicle to reimagine the cities of the.
