

This is one of two implementation documents for the National Transportation Science and Technology Strategy. It deals with the areas of basic or enabling research which are necessary to provide the technological foundation for new and improved transportation systems. The Plan considers the roles of a broad range of parties involved in the transportation enterprise: Federal government agencies; State, local and tribal agencies; academic institutions, and the private sector. It focuses on seven areas of enabling research: human performance and behavior; advanced materials and structures; computer, information, communication systems; energy, propulsion, and environmental engineering; sensing and measurement; analysis, modeling, design and construction tools; and social and economic policy issues.

Living Longer Depression Free: A Family Guide to Recognizing, Treating, and Preventing Depression in Later Life, Continuity during the Storm: Boissy d'Anglas and the Era of the French Revolution (Contributions to the Study of World History), De Davide et Saule homiliae tres (Corpus Christianorum Series Graeca), Faserverbundbauweisen Eigenschaften: mechanische, konstruktive, thermische, elektrische, ökologische, wirtschaftliche Aspekte (German Edition), Stolen Hearts, Cloth Paper Scissors Sept/Oct 2010 Issue 32, Tatr--A Prototype Expert System for Tactical Air Targeting (Rand Report),
