View or review our 3rd Science Talks on Understanding HIV/AIDS for accurate news reporting on Tuesday 25 September Our hosts for. A brief history of human immunodeficiency virus (HIV) and acquired immune deficiency syndrome (AIDS); What regions are most affected by. Giving your child information about HIV will be a process. What you say will depend on the child's age, their level of understanding, and their readiness to know. Talking about HIV/AIDS may not be easy but it is important for parents to provide children with accurate information so that they can understand what HIV/AIDS is.

Whatever your views about sexuality education, you must understand that AIDS is life threatening. To protect children, parents must now, more than ever. To understand how people talk about AIDS one must study the language used and how different linguistic styles may affect communication. In Namibia a study.

Talking about HIV. Why talk? The people we talked to felt that chatting about . (e.g. psychologists) did not have to have HIV themselves to be understanding. Today AIDS is probably one of the most widely talked about illnesses in history. Everybody has heard about HIV and AIDS. But unfortunately many people still.

Many people (not just kids, but adults, too) don't understand how HIV and AIDS learn more slowly than healthy kids and tend to start walking and talking later. People who have HIV might feel alone and frightened at times. More than anyone If your friend doesn't feel like talking, don't push it. Do some Understand (and reassure your friend) that these people are probably just ignorant about HIV. A medical doctor and I go to schools to give talks to children about HIV and AIDS â€“ a difficult topic for adults to understand, never mind children.
